this case study of a politically reformed middle sized midwestern city provides a model of fiscal stress that contrasts sharply with that of america s vast metropolitan centers dr rubin examines the interaction of social political and economic causes of the city s predicament she then goes on to analyze the specific factors that solved the city s problems over a six year period finally she offers a self correcting mechanism that would allow a city to save itself from financial trouble without direct state or federal assistance this study suggests that local political factors were even more important than national factors in contributing to the city s fiscal stress it also brings into question the theory that generosity to the poor creates urban fiscal stress and that giving less to the poor will solve urban financial problems
